Key

## NOTE!

Stations of MH's <u>cannot</u> be changed
MH-1 & MH-3 elevations are <u>fixed</u>
MH-2 elevation may change
Pipe may go above or below cable,
but minimum grade must be observed
and minimum clearance must be maintained.

1. What is the station of MH-2?

Station = <u>8+75.00</u>

2. What are the inverts of MH-2 for the sewer line as designed?

Invert IN = <u>249.20</u>

Invert OUT = \_\_\_**249.00**\_\_\_\_\_

3. Should the sewer pipe redesign go above or below the cable? Why?

Under – MH-1 to MH-2 does not meet minimum grade for over

Over: 1-2 = -2.567% 2-3 = -4.622% Under: 1-2 = -4.680% 2-3 = -3.213%

4. What are the inverts of MH-2 for the redesign that works?

Invert IN = <u>246.25</u>

Invert OUT = <u>**246.05**</u>
